## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-12 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. While Siemens et al (EP 1222037) teaches sorting postal items in a plurality of sorting passes in which image of the surface of each postal items the postal items pass through the sorting machine wherein the postal items recovers in a sort outlet bins during a first sorting pass and are recycled to the inlet of the sorting machine in order to perform the second sorting pass thus the classification order may become disturbs between two sorting passes. Schlegel et al (US 6,813,541) teaches implement the sorting processes in the shortest possible time, by carrying out the fine sorting in parallel on different sorting devices. . Neither Siemens nor Schlegel teaches sorting postal items in a plurality of sorting passes on the basis of using digital fingerprints for the items making it possible to ignore the classification order of postal items at the inlet to a sorting machine between two sorting passes so long as keeping the items in sequence is not constraint of the sorting process. The Examiner finds no reason or motivation to combine the above references in an obviousness rejection thus placing the application in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
